

LEADER COMPANY

Tecno Label is a historic company based in Carpi (Modena, Italy) operating in the textile sector since 1998 and has since then qualified as a partner of the best Italian and international fashion brands.

Thanks to our competence professionalism and great passion for the research, we have been market leaders for years, constantly looking for new technologies to develop advanced techniques and unique quality products, in a 100% Made in Italy production cycle. Dynamism, professionalism, tradition and experience characterize our way of working and our approach to any solution.

Passion, enthusiasm and inspiration lead us to take on ever-changing challenges, with innovative and revolutionary achievements. Being at the forefront and knowing how to intercept evolutions and trends is a mission for us!

UNIQUENESS AND INNOVATION WOVEN SOLUTIONS

We empathically cooperate with our customers, we become their most trusted and very first partners, we listen to their needs, we know them thoroughly to develop their ideas and satisfy every single request in the best possible way.

From fine fibers and certified raw materials we know how to weave innovative products with style and originality with experience, commitment and avant-garde technologies.

We work with flexibility and efficiency, and create our products with very high definition Jacquard weaving, using any type of yarn, from polyester to all natural, recycled and ecological yarns.

We create labels, ribbons and trimmings for the fashion market, fabric customized accessories for any target or brand (all uses bags, shopping bags, scarves, tablecloths, napkins, runners, lampshades, cushions, coasters...), with any type of application: metal accessories, Swarovski, embroidery, thermo-adhesive...

We are able to insert RFID antennas on labels and fabrics, and to propose anti-theft and anti-counterfeiting solutions.

PHILOSOPHY AND SUSTAINABILITY

Textile is a sector that is experiencing a time of great changes, with major investments in the research and development of new sustainable solutions, with the creation and use of innovative, high-performance and reliable applications and fabrics, derived from raw materials, natural and / or recycled.

With a view to respecting and protecting the environment, our company increasingly uses eco-sustainable, recycled, regenerated or natural yarns, on which it particularly focuses, implementing a policy of optimizing its quality standards and attention to environmental impact.

To guarantee quality management and controlled traceability, Tecno Label S.r.l. also obtained the Oeko-Tex® Standard 100 Class I Certification already in 2008.

OUR SERVICES

With our 100% Made in Italy production we offer competence and professionalism for the entire production cycle of the product.

Commercial Service

Our sales department is always actively present, provides specific and personalized advice based on different needs, and is at the complete disposal of the customer to ensure timely and competent answers, formulates quotations, forwards orders in a very short time and provides a solid and important service of after-sales assistance.

Style and Graphics Dept.

Our style and graphics department is made up of a team of professionals who know how to create coherent, innovative and captivating products with competence and imagination.

With the continuous search for fascinating styles, techniques, materials and finishings, they study and implement any project by listening to the customers' needs and expectations, interpreting their objectives in the best possible way with passion and creativity.

Technical Dept.

The employees of our technical department are responsible for conceiving and elaborating distinctive and always unique ideas and offer high quality technical performances with the help of avant-garde technologies for any solution. Our operators constantly experiment with systems and techniques for textures and weavings that are always new, playing and mixing colors with always different finishings, processes and prints.

Weaving Process

Each Jacquard creation comes to life from the majestic intertwining of precise sequences of weft and warp threads, based on the complexity and particularity of the design and the type of weavings to be made and through the use of innovative machinery and technologies, with a careful constant control and supervision by our specialized weavers.

Finishing and Quality Control Depts.

Our employees carry out with meticulous care the finishing and inside quality control operations on the product at the end of the production cycle, in order to verify the perfect execution of each phase previously performed and to guarantee the best result in terms of quality.

OUR WOVEN PRODUCTS

We masterfully and dynamically create products and fabrics of all kinds with very high definition Jacquard weaving with any type of yarn, from polyester to all natural, recycled and ecological materials, from the thinnest to the most particular ones. We study complex textures of all kinds, weaving sequences of threads to create any type of design, logo, customization. Some examples of what we can do?

R E S E A R C H
D E V E L O P M E N T
T E C H N O L O G Y

From the very beginning we have laid the foundations of our work on the research and development of new techniques, investing in innovative and cutting-edge technologies.

We believe it is fundamental and differentiating to design, implement and patent new and performing solutions, obtaining the best results in the product, in order to put our expertise, our know-how and our means at the disposal of customers who place their confidence on us.

With constantly evolving technique, research and creativity, we enhance the image and identity of each product and each brand to the maximum, studying complex systems with care and attention, finding the most suitable solutions for each individual creation to express its beauty, character and particularity.

K N O W - H O W
A N D P A T E N T S

Tecno Label's history and work have always been based (and still are) on research and development. We have always considered it essential to make our wealth of experience, skills and knowledge available to our customers, consolidating the value of our know-how with innovations and patents to which we have always paid particular attention for the implementation of the quality of products and services we offer.
